

Lesson Assessment – Introduction to Core Prompting Techniques

Name: Shaik Mohammad Shaheed

Course: Prompt Engineering

Lesson: Introduction to Core Prompting Techniques

CHAIN-OF-THOUGHT (CoT) PROMPTING

Exercise 1: Simple Reasoning

Task

Decide whether 45 is divisible by 9.

Answer

Step 1: A number is divisible by 9 if the sum of its digits is divisible by 9.

Step 2: The digits of 45 are 4 and 5.

Step 3: $4 + 5 = 9$.

Step 4: Since 9 is divisible by 9, 45 is divisible by 9.

Final Answer: Yes, 45 is divisible by 9.

Exercise 2: Marketing Message Evaluation

Statement

"Our ERP improves productivity."

Answer

Step 1: Target Audience

Businesses looking to improve operational efficiency.

Step 2: Missing Information

- How productivity improves
- Key features
- Measurable benefits
- Target industries

Step 3: Evaluation

The message is too generic and lacks evidence to convince potential customers.

Improved Statement

"Our cloud-based ERP automates business processes, reduces manual work, and helps businesses increase productivity by streamlining daily operations."

Exercise 3: Feature-to-Benefit Thinking

Feature

Cloud-based ERP System

Answer

Step 1

A cloud-based ERP system stores business data online, allowing secure access from anywhere with an internet connection.

Step 2: Business Benefits

- Employees can work remotely.
- Reduced IT infrastructure and maintenance costs.

Step 3: Conclusion

A cloud-based ERP system improves accessibility, flexibility, and operational efficiency for businesses.

Exercise 4: Decision Making

Task

Should a startup use Excel or ERP Software?

Answer

Excel Limitations

- Manual data entry
- Difficult collaboration
- Higher chance of errors
- Limited scalability

ERP Advantages

- Centralized data
- Process automation
- Real-time reporting
- Better collaboration

Comparison

For a small business with minimal operations, Excel may be sufficient. As operations grow, ERP provides better efficiency, automation, and scalability.

Final Decision

A startup planning for long-term growth should adopt ERP software.

Exercise 5: Problem Analysis

Scenario

A company faces delays due to manual data entry.

Answer

Root Cause

Manual entry takes time and increases the possibility of human errors.

How Delays Occur

Incorrect or duplicated entries require corrections, slowing down workflows and reporting.

Solution

Implement ERP software with automated data entry and workflow integration to improve efficiency and reduce delays.

ReAct (Reason + Act) Prompting

Exercise 1: Weak Statement Improvement

Statement

"Our software is good."

Answer

Analysis

The statement is vague and does not explain any benefits or unique features.

Missing Information

- Key features
- Customer benefits
- Business value

Improved Statement

"Our ERP software automates business operations, reduces manual work, and improves overall productivity."

Exercise 2: Resume Enhancement

Resume Line

"Worked on testing."

Answer

Analysis

The statement lacks detail and does not explain responsibilities or achievements.

Improved Resume Bullet

"Performed software testing, identified defects, documented issues, and collaborated with the development team to improve application quality."

Exercise 3: CTA Optimization

CTA

"Click here."

Answer

Analysis

It does not explain why users should click or what benefit they will receive.

Improved CTA

"Book your free ERP demo today and discover how to streamline your business operations."

Exercise 4: Email Content Fix

Email Line

"We offer ERP solutions."

Answer

Analysis

The message lacks customer benefits and persuasive value.

Target User

Business owners and managers.

Improved Email Line

"Our ERP solution helps businesses automate operations, reduce costs, and improve productivity with real-time business insights."

Exercise 5: Bug Description Rewrite

Bug Report

"System is slow."

Answer

Missing Information

- Which page
- Response time
- Device
- Browser
- Frequency
- Steps to reproduce

Improved Bug Report

"The dashboard takes approximately 12 seconds to load after login on Google Chrome (Windows 11). The issue occurs consistently after selecting the Reports module."

SELF-CONSISTENCY PROMPTING

Exercise 1: Short Description Refinement

Version 1

ERP software helps businesses manage their operations.

Review

The description is too general and lacks detail.

Improved Version

ERP software integrates finance, inventory, sales, and human resources into one centralized system, improving efficiency and business decision-making.

Exercise 2: FAQ Answer Quality

Version 1

ERP helps businesses manage work.

Version 2

ERP software integrates different business processes into one system.

Version 3

ERP automates business operations, centralizes data, improves productivity, and supports better decision-making.

Best Answer

Version 3

Reason

It is the most complete, informative, and clear explanation.

Exercise 3: Email Subject Lines

Version 1

ERP Demo

Version 2

See How ERP Can Improve Your Business – Free Live Demo

Evaluation

Version 2 is more engaging and highlights the benefit.

Final Subject

Book Your Free ERP Demo and Discover Smarter Business Management

Exercise 4: Technical Explanation Simplification

Original

Cloud computing delivers computing resources over the internet, allowing scalable access to servers, storage, and software.

Simplified Version

Cloud computing lets you use software, storage, and services online without installing everything on your own computer.

Exercise 5: Role-Based Messaging

First Version

ERP helps businesses manage operations.

Review

The message is too general for managers.

Improved Version

ERP provides managers with real-time reports, better resource planning, and accurate business insights to support faster and more informed decision-making.

Conclusion

This assessment demonstrates my understanding of **Core Prompting Techniques**, including **Chain-of-Thought (CoT)**, **ReAct (Reason + Act)**, and **Self-Consistency Prompting**. I applied structured reasoning, content evaluation, decision-making, and iterative refinement to solve practical business and communication scenarios effectively.
